APPLICATION INFORMATION

Product Description	A thick clear liquid used for the removal of paint, resins and coatings
Directions of Use	<p>Apply AS-10 by either brush or in case of fuel tanks by pouring on to a test area first.</p> <p>Time how long it takes for the coating to blister, once blistered the coating can be removed by a scraper.</p> <p>Do not try to strip any more than approx. 300mmx300xx areas at a time.</p> <p>In the case of a petrol tank you are going to have to pour in enough to be able to remove a small area at a time, the unseen areas will have to be estimated based on your first test area.</p> <p>Once time has passed for the coatings removal fill tank with fresh water and pour away.</p>
Cleaning	Brushes and equipment used can be washed clean in fresh water.
Safety	Wear suitable protective clothing, gloves, face mask and eye protection
