

## RUSTBUSTER BOR-8

### PRODUCT DESCRIPTION

BOR-8 Anti-Flash rust treatment is a very highly concentrated additive for use in water or water-based solutions, pressure cleaning and Hydro Blasting equipment. Only 2% of BOR-8 Anti-Flash will be enough to prevent flash rusting on water blast cleaned steel for up to 3 weeks. BOR-8 can also be used as a dipping solution to prevent flash rusting on small components that have had the rust removed (e.g. used after non-acid rust removers that leave the surface very clean but do not contain an inhibitor

### APPLICATION INFORMATION

|                     |  |
|---------------------|--|
| Product Description | A clear waterbased liquid rust inhibitor   |
| Directions of Use   | Apply neat to blast cleaned or power tool cleaned steel and allow to dry. Bor-8 will stop flash rusting for a minimum 14 days depending on the exposure conditions |
